

## Sustainability Product round two

The unexercised volume of water has been made available to customers as a second round of the Sustainability Product.

Those who participated in round one will be eligible to apply for the 9,600 ML of water, again being offered at \$216 per ML. This may interest customers who received an offer lower than their initial requested volume.

Customers have until this Thursday, 13 August 2020 to enter an expression of interest. Offers will be made next week.

Full details of the Sustainability Product round two can be found in the [Customer Briefing](#) that was distributed today.

## Online Customer Briefing survey

Your feedback on our recent online Customer Briefing would be appreciated.

Click [here](#) to complete a quick survey, which will close on Thursday, 20 August 2020.

If you missed out on viewing the online Customer Briefing, it can be found [here](#).

## Operating Mode

Customer Operations has transitioned from Mode One – Drought operations, to Mode Two – Dry operations this week.

### What does this mean for customers?

- Channels operated at full supply height only where orders are placed, or future orders are known
- Four days' notice required for orders
- Online ordering system will automatically offer 96 hours (four days) in advance
- Orders reviewed daily and customers contacted when water can be delivered earlier than four days
- Stock and domestic supply - customers should call Customer Operations to request temporary intervention where there is an inadequate supply height.

Further information is available in last week's update [here](#) or by contacting Customer Operations.

## Irrigation Intentions Survey

As part of Mode Two operations we need to understand customers' upcoming irrigation programs.

A short five-minute Intentions Survey will be released to customers tomorrow.

Customers are encouraged to complete the survey to guarantee water delivery and help us plan our operations.

The information will also support our preventative maintenance program and identify areas where potential restrictions may occur, so we can work with customers to manage these.

## Domestic deemed usage credit

Murray Irrigation is offering a 2ML water allocation credit for unused stock and domestic pipe outlets for the 2020/21 season.

Application forms are available [here](#) and must be returned to Customer Operations by 5.00pm on Friday, 25 September 2020.

For a copy of the form, or any queries, please contact Customer Operations.

## Water for Fodder review complete

The Department of Agriculture, Water and the Environment has now completed the review of the Water for Fodder program.

The review, as required in the arrangements for the program, examined key areas, including improvement opportunities for future programs.

Details of the review and the full report can be found [here](#).

## Murray Irrigation offices closed

A reminder that our offices are still closed to ensure that we comply with COVID-19 safe regulations.

Please use our online customer portal or contact our Customer Operations team via phone or email if you have any questions.

Please post any documents to Murray Irrigation at PO Box 528, Deniliquin, NSW, 2710.
