

Water delivery 2020/21

Murray Irrigation has delivered a total of 395 GL on-farm this season.

This compares to 53 GL, at the same time last season.

The increase is a result of improved General Security allocation and water made available through Murray Irrigation's Water Well suite of products.

The top four usage for this season can be seen here.

Ordering water

Customers will notice our water ordering system automatically offers the earliest available date for delivery.

This is based on the available capacity within our channel network.

If you would like to request an earlier date than the one offered by the system, please submit an *unsatisfied order*.

All unsatisfied orders are assessed, and customers are notified if earlier delivery can be offered, or if restricted flow rates may need to be applied.

To guarantee supply, four days-notice should always be given.

These changes are in line with our Mode Two operations and increased water availability.

Sustainability Product and December 2020 invoices overdue

Unpaid invoices for the Sustainability Product and the December 2020 quarter invoice are now overdue and will accrue interest from today.

Please contact us to discuss payment options.

Drainage field walk

Rice Extension, funded by AgriFutures, are hosting a series of field walks to inform local farmers of their options relating to several topics.

These include:

- drainage decision making
- using NDVI imagery for drainage and harvest
- harvest update from Grower Services.

For more information, and to register your interest, click [here](#).

Managing delivery risks webinar

The Murray Darling Basin Authority (MDBA) is hosting a webinar that looks at the changes in water use in the River Murray and the risk of delivery issues.

Participants will hear about environmental, summer demands and more.

Full details are available [here](#).

Last issued quarter – Two (December)

Issue date – Friday, 22 January 2021

Due date – Monday, 1 March 2021

December 2020 invoices - now overdue.
