

## End of season Carryover

Customers should consider their allocation accounts prior to the end of the season.

Carryover is capped at 50 percent of Class C water entitlements held, and any volume exceeding this will be forfeited at the end of the season.

Once that allocation account reaches its limit of 110% (carryover + allocation) in 2021/22, no additional water is allocated to that account.

E.g. if you carryover 40%, any allocation exceeding 70% will not be received.

SRI will commence their own collection of funding towards their advocacy efforts, with Murray Irrigation assisting with the implementation of this process.

Contributions will be voluntary and further details will be sent this week.
