Inspector-General of Water Compliance

Last Friday Murray Irrigation had an introductory meeting with the Inspector-General of Water Compliance, The Hon. Troy Grant. At the meeting Mr Grant introduced his staff and outlined key priorities.

Murray Irrigation had the opportunity to raise a number of important matters for our region, especially the need for policy change to improve General Security allocations and reduction of river losses.

It is proposed Mr Grant will visit the region in late 2021. You can read more about the IGWC on their website [here](#).

\$3M for Barmah Choke Feasibility Study

The Hon. Sussan Ley MP announced \$3M in funding for the Barmah Choke feasibility study last week. Murray Irrigation has been advocating for this

project and funding for the past two years to optimise the river system and reduce water losses to improve outcomes for General Security water holders.

Service Levels for customer supply

Water supply to customers can be influenced and affected by one or more activities and systems including:

- WNSW maintaining height at our offtakes.
- Our control system (channel operation) performance and the way our frontline team respond to anomalies.
- Our water ordering system functionality (specifically, our flow share module).
- Prioritisation and completion of maintenance issues within our channel network.

Recently, we have been experiencing some difficulties in maintaining water height at many customers outlets with up to approximately 20% of orders in the last week delivering less than 90% of the flow ordered, and in some instances, much lower than that result.

Customers on the Wakool system appear to have been most directly affected and we apologise profusely to these customers.

Please be assured we are aware of the performance, and are working diligently (both internally, and with our suppliers) to try and resolve the combination of issues contributing to the poor result in a responsive manner. Please continue to notify our customer operations team if you are experiencing water supply difficulty.

Invoices

Last issued quarter – Four (June)

Due date – Sunday, 29 Aug 2021

Statements will be issued this week.

Announced allocation

Class C General Security.....	30%
Allocation Advance.....	8%
Water resource distribution	0%
