## Control System operating process

The water delivery network is managed by operators who confirm information from the field on outlets & regulators prior to executing an operational area. Following confirmation and adjustments the offtakes, regulators, and outlets receive an instruction to move in the field.

## What does this mean for you?

Starts, finishes & changes will now typically happen within 30 minutes of the standard outlet operating time, listed on your customer portal. If your outlet is not operating as expected outside this 30-minute operational window, please contact Customer Operations.

## Announced allocation

Class C General Security.....	110%
Allocation Advance.....	8%
Water resource distribution .....	3%

## Water availability and deliveries\*

(01/03/2022)
