

New CEO appointed

Agribusiness executive, Ron McCalman has been appointed as new Chief Executive Officer of Murray Irrigation. Based in Deniliquin, he commences on 20 June. More details in yesterday's [Shareholder Update](#).

Carryover rules

The Water Sharing Plan (WSP) carryover rules enable customers to carryover up to 50% of Class C water entitlements held in their water allocation account each season. Any volume exceeding this is forfeited at the end of the season.

Carryover also influences the amount of allocation a water account can receive in the subsequent season. Under the WSP the maximum allocation a water account can receive in any season is 110% of the water entitlements held.

As demonstrated in the diagram below, carryover is added into the maximum allocation calculation. For example, if you carryover 40%, any allocation exceeding 70% will not be received.

Your water allocation account

WEX Closure - Unsold water

When the WEX closes on 22 June, any unsold water remaining on the Exchange is returned to relevant customer accounts.

It is then up to customers to decide how to manage any water to avoid forfeiture. Options (depending on customer) include:

- Carryover,
- External transfers out of MIL to river licences or other valleys, or
- Internal transfers between your landholdings.

2022 Trade closure dates

5.00pm Wednesday 22 June – closure of Water Exchange (WEX)

5.00pm Friday 24 June – closure of external transfers to / from Murray Irrigation

5.00pm Monday 27 June – closure of internal transfers and access to the customer portal

9.00am Friday 1 July – re-opening Water Exchange and customer portal.

Safety for Women in Agriculture

Women working on farms or connected to farming are invited to participate in a FREE Lunch and Learn event about safety on farms.

Topics include safety while working near the electricity network, electrical safety, emergency preparedness and response, and vehicle safety.

Venues: Finley 9/6/22 or Griffith 7/6/22. Full details [here](#).

2022 Winter Works Reporting

	Planned	Complete
Asset Maintenance civil remediation, servicing & replacement of gearboxes & sensors	598	0.5%
Inspections structure inspections while the channels are empty	570	0.35%
Channel Maintenance bank building, de-silting for weed removal and batter protection	approx. 180km	0%
In Season Works critical maintenance work required in non-maintenance zone areas	65	0%

Preparation activities for works are nearing completion and winter works are just ahead of schedule. If you want to discuss the program, let us know and we will get in touch.

Performing our winter works safely and with as little disruption as possible to customers is our highest aim - please let us know if you have any concerns.

Winter water delivery

Non-guaranteed water supply is available in areas not closed for maintenance in 2022, subject to water levels in your channel section. You can check your Operational Area via the "My Outlets" tab on your [Customer Portal](#).
